

Assistant view

The Assistant role provides support to the Presenter in a separate channel, this role can view the open applications and files but is unable to interact with them.

The Room Chat allows the Assistant to interact with all the Participants in the session, being able to:

- Mention a Participant personally
- Clear the chat history by clicking on the “Trash”

Through the Participants panel, the Assistant can see the information about room members, and do actions like:

- Block/Unblock Participant camera.
- Block/Unblock Participant microphone.
- Block the microphones of all Participants.

Participant view

The Private Chats allows the Assistant and Participant to interact privately.
