## Comillas Pontifical University opens its new immersive, hybrid learning environment with mashme.io Room of the Future technology

Comillas Pontifical University founded in 1890, is one of the oldest and most renowned universities in Spain. Headquartered in Madrid, with campuses in Cantoblanco and Ciempozuelos, Comillas becomes the latest university to select the **mashme.io** platform. Welcome to the **Comillas Conecta Lab**.

The university was seeking a superior and more engaging and immersive technology for its new facility in order to deliver programmes for its graduate and post-graduate cohorts. The **mashme.io Room of the Future** was chosen as part of a new initiative to provide a world-class teaching and learning hybrid environment for students and faculty.

The **Comillas Conecta Lab** is a flexible space that accommodates students both remotely and on-campus, to collaborate in a more personalized manner, regardless of location. The large 18 screen UHD video wall, in a 6x3 layout, renders 40 life-size images of remote students in Real-time. The exceptional low latency and mashme's 'shared memory' patented technology enables natural conversation to flow between all participants. Presenters can switch seamlessly between content without delay, share material, collaborate on documents and participate in polls as if they were all sitting in the classroom.

Sala Inmersiva - Comillas Conecta Lab

"The installation of the **mashme.io Room of the Future** is part of an ambitious initiative that **Comillas Conecta Lab** constitutes. As a space for educational innovation, it aims to offer a unique training experience to students and teachers, in which the educational objectives are delivered in a more effective and profound way, explains Antonio Obregón García, Vice-Rector for Academic Planning and Teaching Staff. We take further steps in our purpose of integrally training students by using the most appropriate resources at our disposal, as is undoubtedly the case with the **mashme.io Room of the Future**. "

The **Room of the Future** technology was designed from inception to deliver solutions for higher education and corporate training. As such, the **mashme.io** feature-rich platform is continually being developed to meet the needs of the demanding and accelerated growth within the edtech sector.

"It is always an honour to be selected by well renowned learning institutions such as Comillas, and to play a part in the delivery of excellence in education. I am delighted that the mashme team has the opportunity to work with such experienced faculty and learning technologists", says Victor Sánchez, CEO and Co-Founder of **mashme.io**.

## About Universidad Pontificia Comillas

The Universidad Pontificia Comillas is a Catholic university, run by the Society of Jesus, based in Madrid and has campuses in Madrid, Cantoblanco and Ciempozuelos. It was founded in Comillas in 1890. It is one of the most renowned universities in Spain. A large number of managers, businessmen, politicians, jurists, researchers and senior officials of the Spanish Administration are either alumni or have taught at the university. The University is especially relevant in the business field: from the Ranking Forbes 50 best CEOs in Spain 2018, ten were Comillas alumni. Likewise, numerous high-ranking officials of the Catholic Church, theologians and canonists have passed through its classrooms.

## About SyncRTC

SyncRTC is a global company headquartered in the US specializing in cloud-based video collaboration. Its **mashme.io** platform, and associated solutions including Room of the Future, have created a new paradigm in training and education by enabling integrated real-time online multimedia collaboration with many-to-many live video interactions. Leading corporations, universities and business schools worldwide are using SyncRTC's technology to create immersive, simulated educational environments that serve as a virtual alternative to in-person meetings, training sessions, and educational programmes.
