

LT&D Selects mashme.io to Power Their Portable Digital Classroom

SyncRTC

13 March, 2019

Languages Training & Development (LT&D), a teacher training school near Oxford, UK, has selected [mashme.io](#) to build their new virtual classroom. The single screen **Delegate Room of the Future** solution will enable LT&D's remote students to take advantage of their onsite learning programmes seamlessly.

LT&D procured the Delegate Room of the Future, a product designed for smaller classrooms and meeting rooms, specifically to run their Masterclasses in New Technologies Project. The Project, which will virtually train cohorts of up to 16 professional people to become teachers, is funded by the Department for Education and The Education and Training Foundation (ETF)'s **Taking Teaching Further** programme.

“We needed a simple-to-use, flexible training solution that would allow our remote students to fully engage in our education programmes across the UK and globally,” said **Phil Davies**, Managing Director of LT&D. “Our solution will not only enhance the learning experience for our online students regardless of their location, but it will also help us conserve our educational resources and reduce our carbon footprint.”

[mashme.io Room of the Future](#) is a digital ed-tech training platform that is designed to deliver an exceptional and fully immersive e-learning experience for educational and corporate environments. All AV components are controlled by [mashme.io](#) software, a cloud-based **video collaboration** platform optimized to deliver UHD video quality over a public network. Its simple operation and easy browser-based connectivity simulate the teacher/pupil engagement that you would find in a physical classroom.

About Languages Training & Development (LT&D)

Languages Training & Development (LT&D), established in 1996, delivers English Language, Teacher Training and Erasmus Plus programmes, and a range of other apprenticeship / Vocational Skills programmes near Oxford in the UK. LT&D provides certificate and diploma training for more than 100 teachers per year, often from abroad. LT&D's status as an official provider for the EU and UK government means its programmes attract significant subsidy or are sometimes completely free.
